Client Installation and Configuration
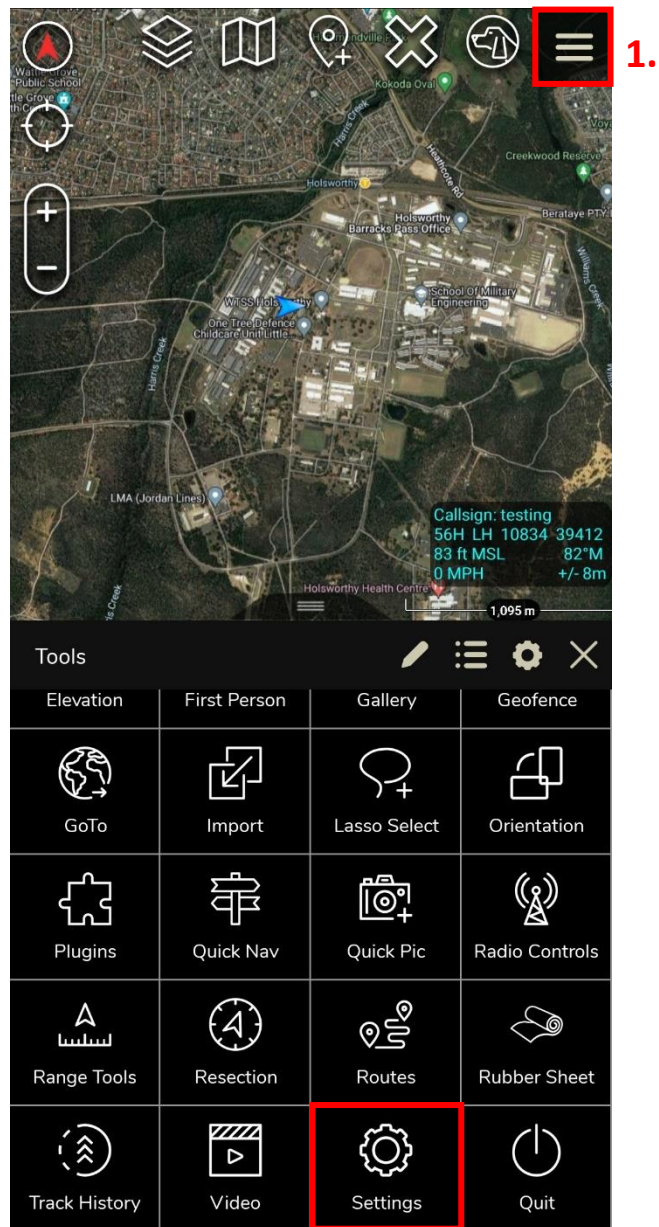

Installing ATAK-CIV

Search for 'ATAK' in the google play store, install the application, the correct application is displayed below:
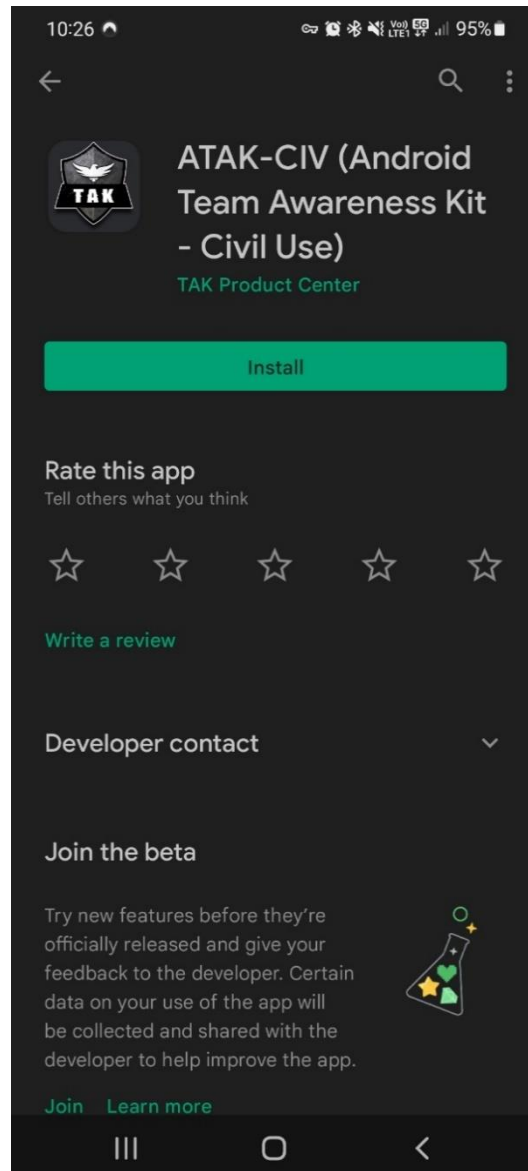

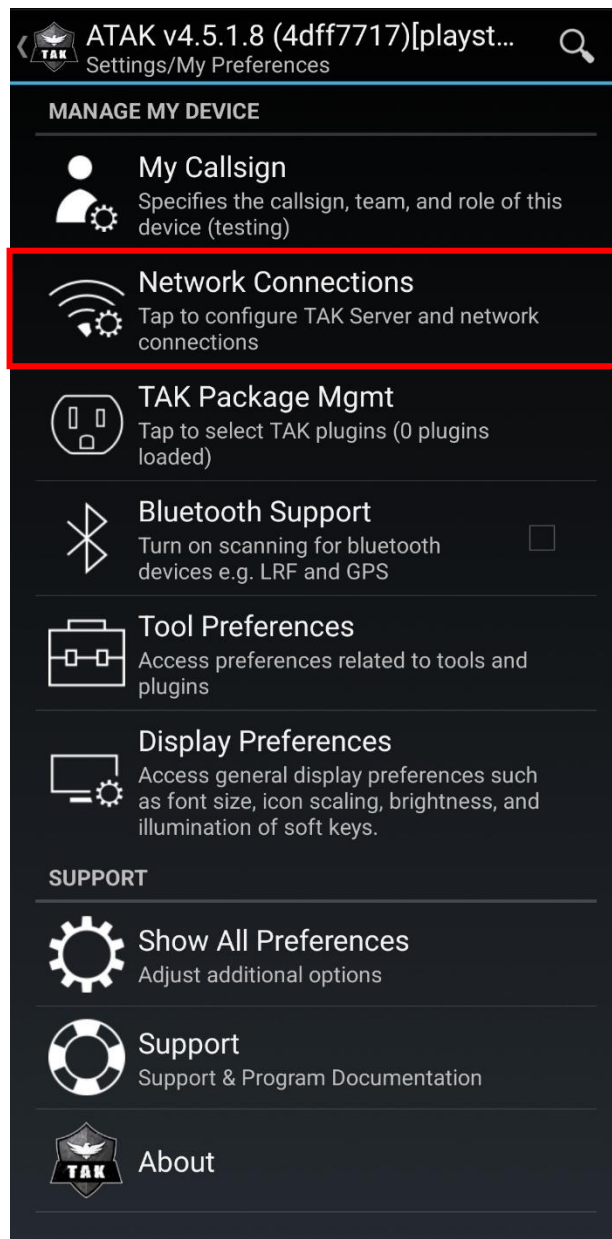

Network Configuration

Perform the following steps to connect your device to your previously configured FreeTAKServer.
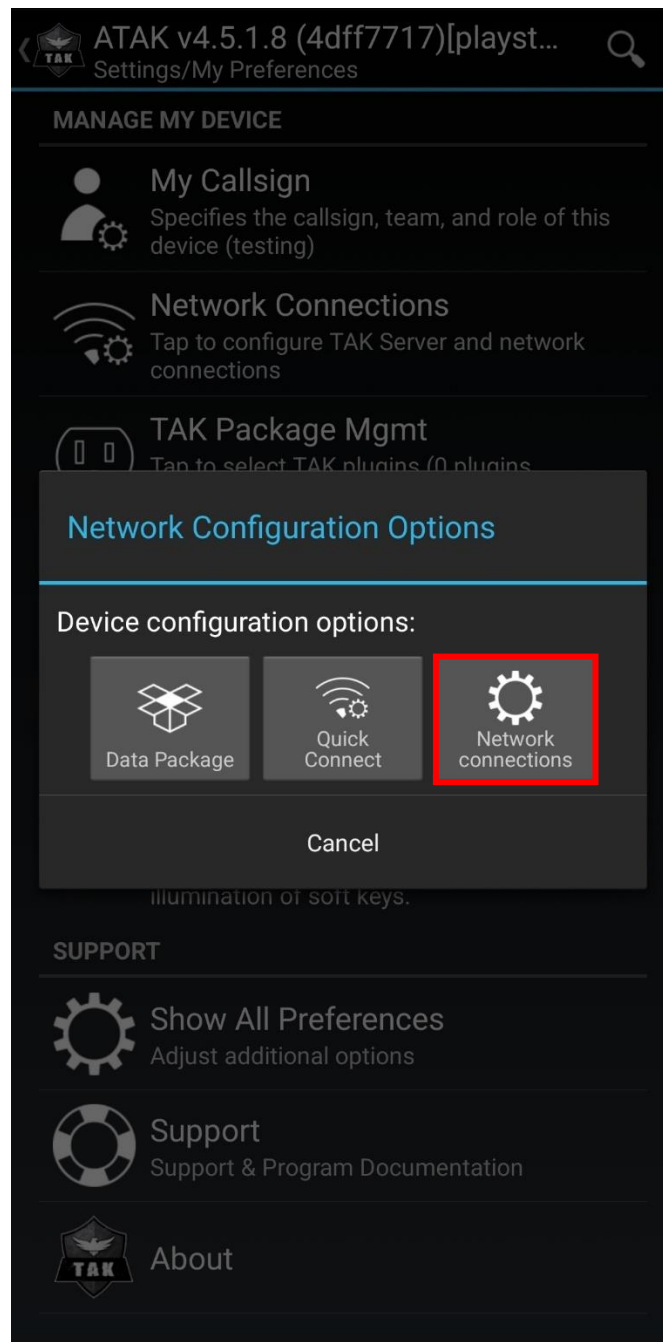

Open the menu and navigate to the 'Settings' menu

Open the 'Network Connections' menu

Select 'Network Connections'

Select 'Manage Server Connections'

Open the menu from the top right of the screen and select 'Add'
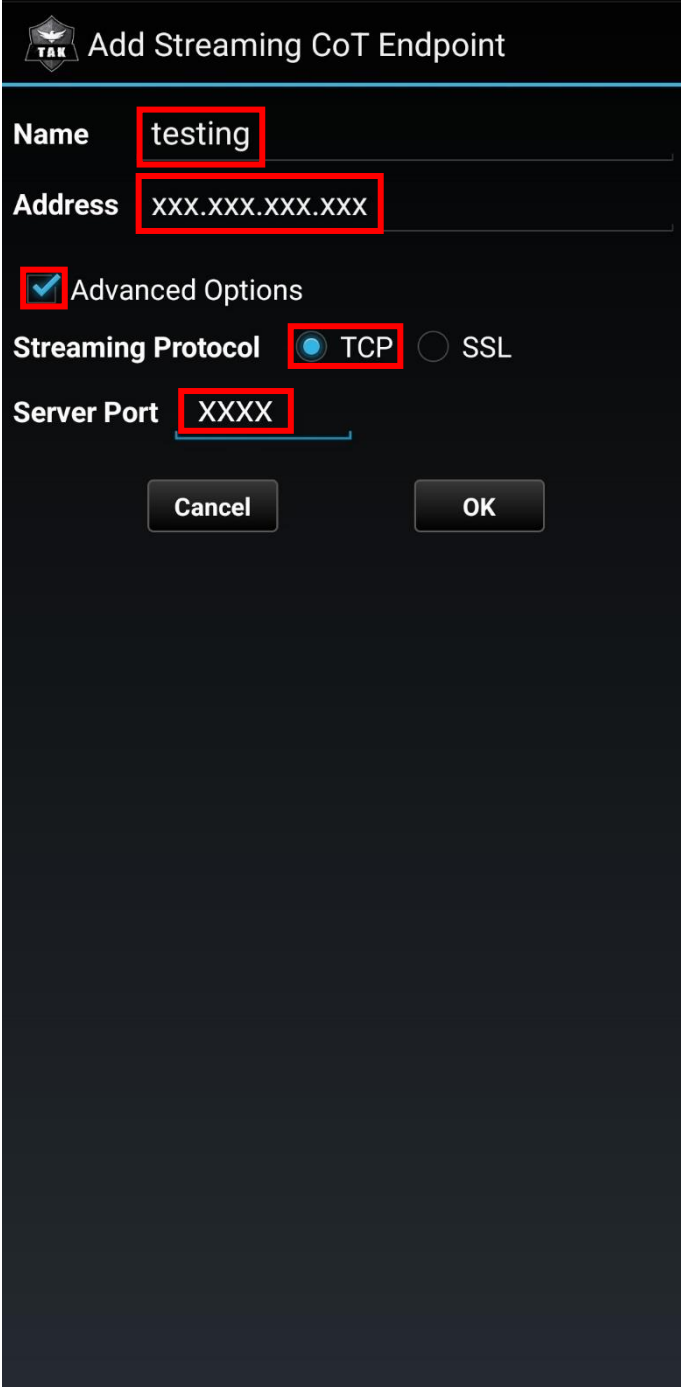

Enter your server information:

> **Name** – name for the network configuration

> **Address** – public IP address of the server

Select 'Advanced Options'

> **Streaming Protocol** – TCP

> **Server Port** – Port you have configured for your server (see server build guide)

After configuring the network connection your device will attempt to connect to the server, the green circle denotes a successful connection.
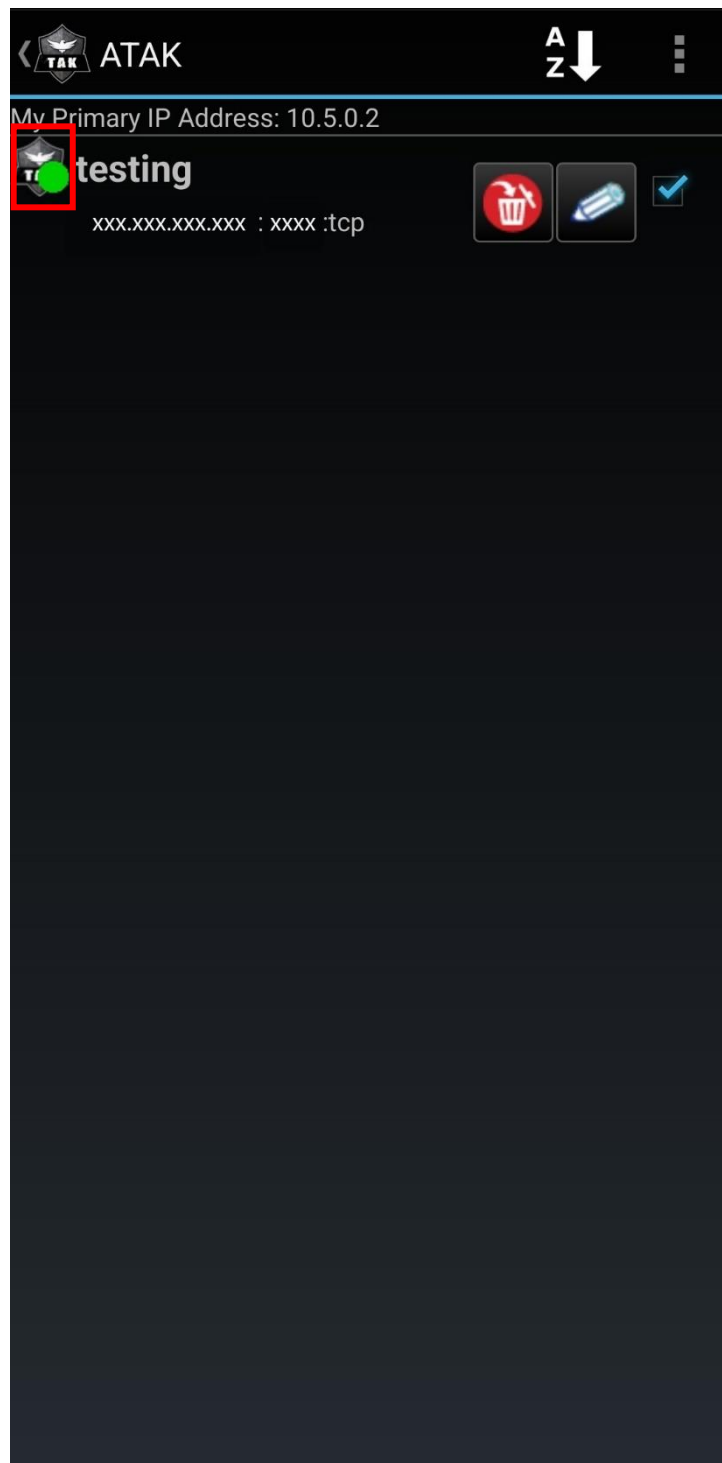

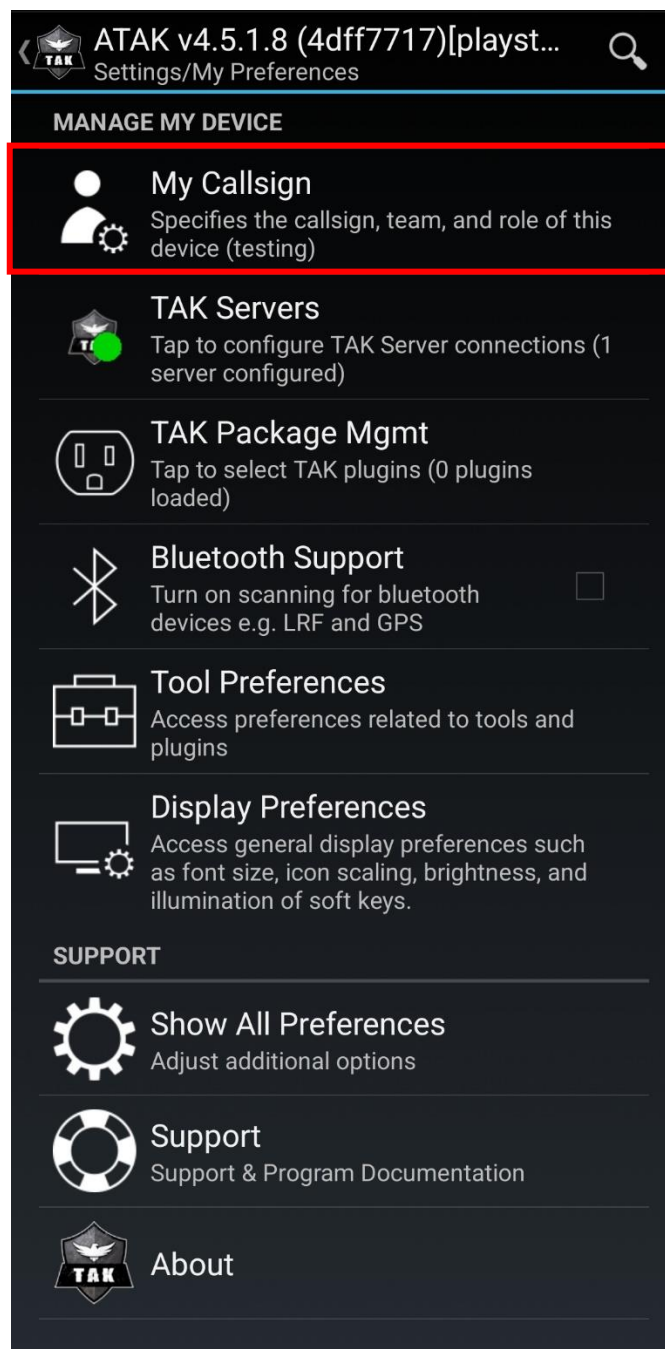

Changing Callsign

Open the menu and navigate to the 'Settings' menu
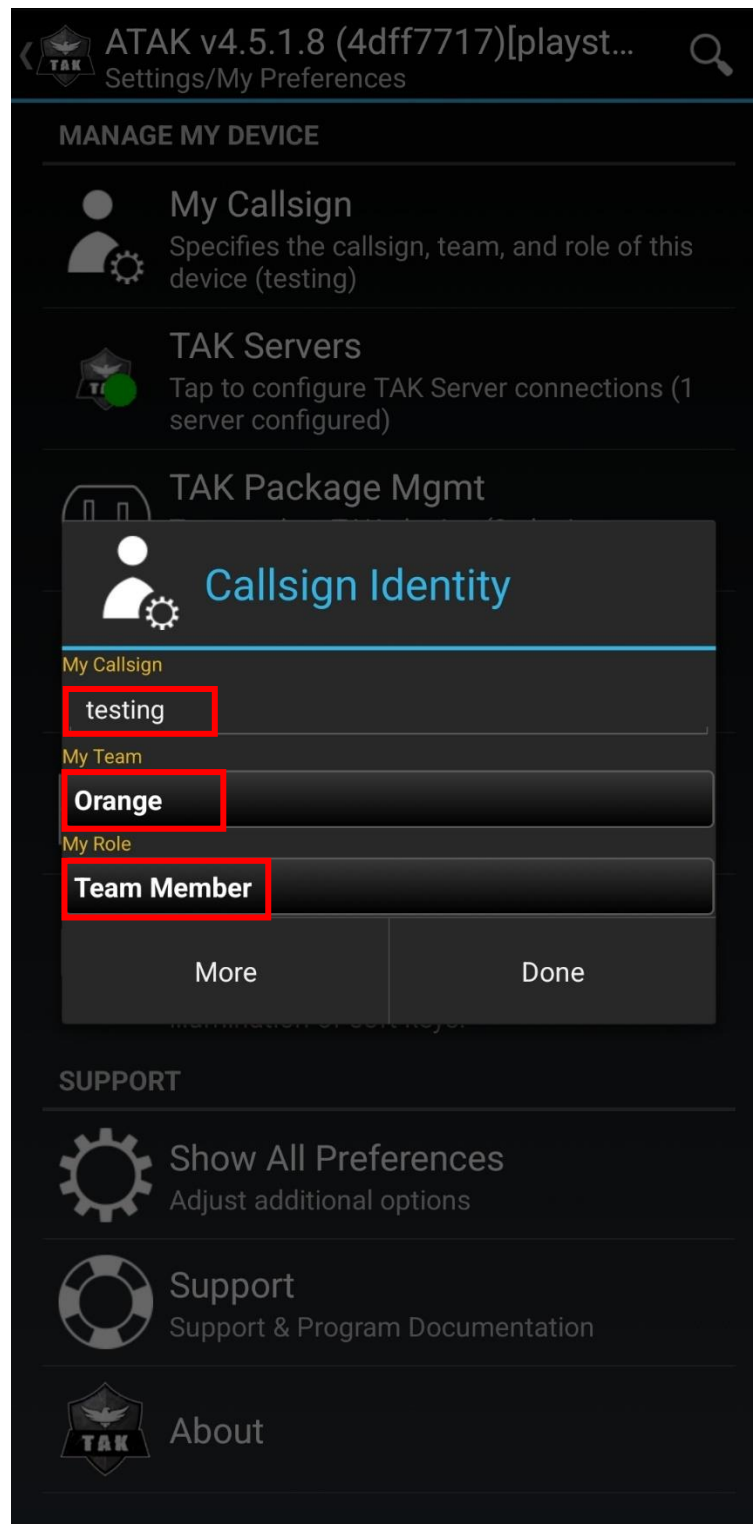

Open the 'My Callsign' menu

Enter your callsign information:
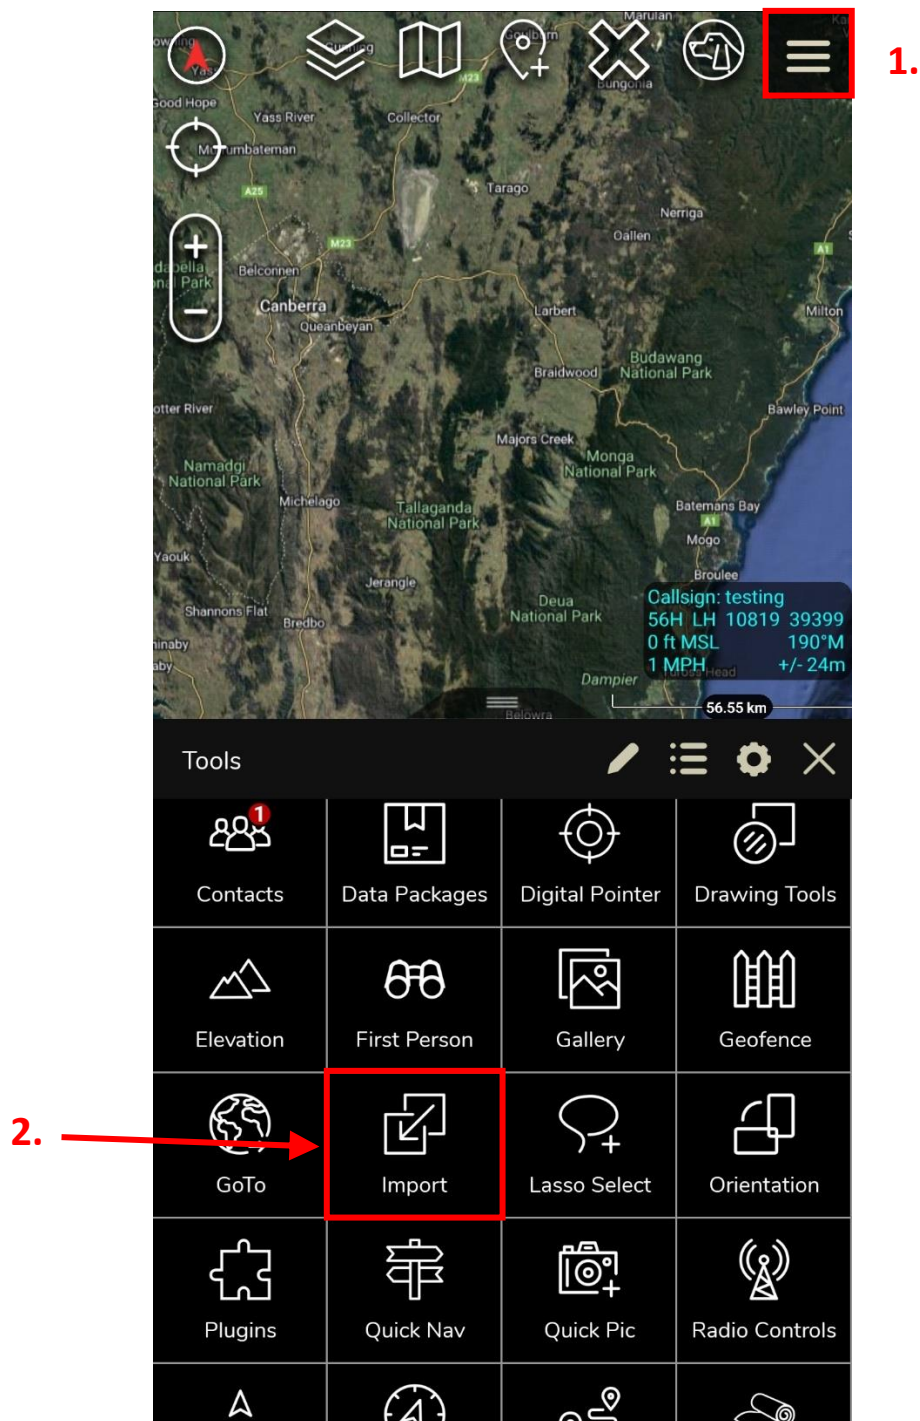

My Callsign – your individual callsign

My Team – your team colour
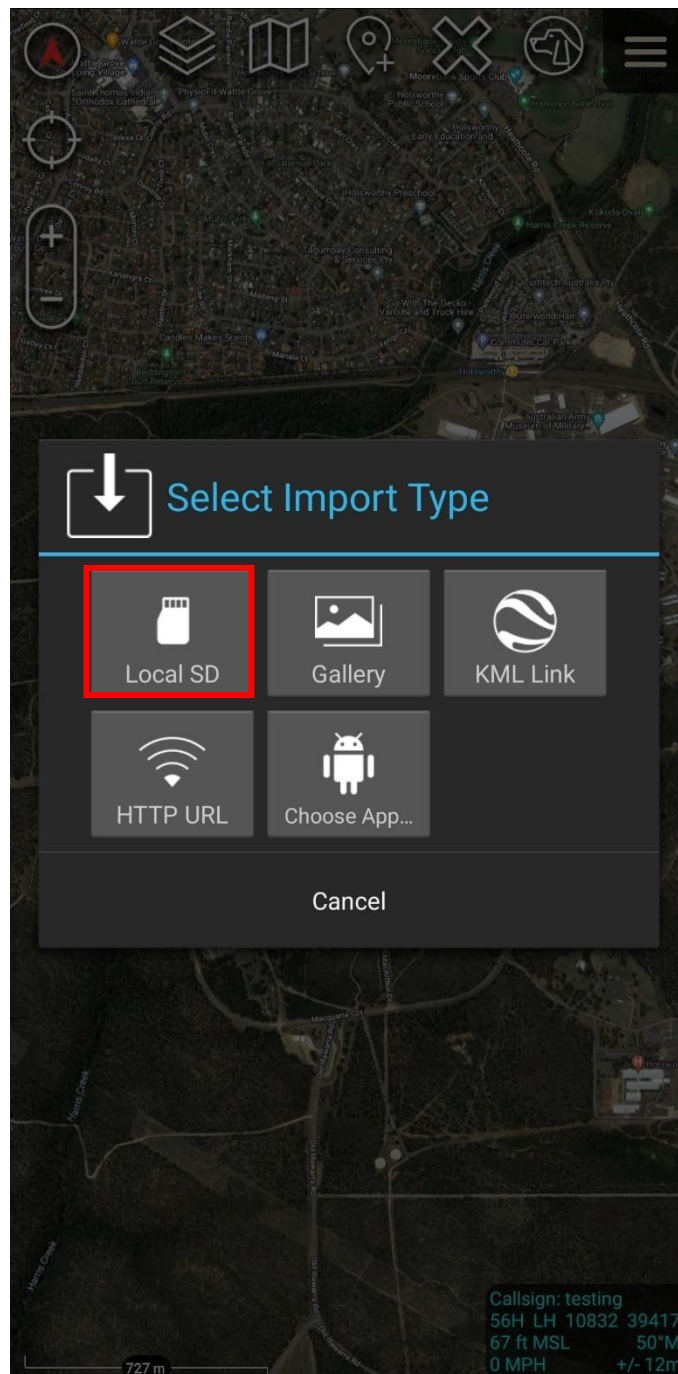

My Role – your role within the team

Importing Mapping Sources

Open the menu and navigate to the 'Import' menu

Select the 'Local SD' option

Navigate to and select the file you wish to import and select ok

NOTE: The mapping source used was downloaded from the following link:

https://github.com/joshuafuller/ATAK-Maps

Once the mapping sources have been imported you will be able to select them from the mapping sources menu

NOTE: The selected mapping source will be highlighted blue
